

Old Kentucky Home Structure Report

Thinking about your visit to the Old Kentucky Home, please use your memory to answer the following questions. You may also opt to revisit the home.

1. What materials is the structure made of? (Look at the walls, windows, doors, porch, etc.)
2. What landscape surrounds the structure? What is it built on? (How might the landscape affect the structure?)
3. How was this structure built? (What tools, etc. were used to construct the structure?)
4. Based on what you see, when do you think the structure was built? (Walk around it. Pay attention to the foundation, the walls, etc.)
5. What irregularities in the structure do you notice? (Can you tell if there have been additions to the structure?)
6. What is the purpose of the structure?
7. Based on the additions of the structure, what do you think the new purpose of the structure became? (How did the structure change?)
8. Think of the history of Asheville. What can that tell you about the building?
9. If someone made this today, how would it be different?
